

Miller's is making a splash in West Palm Beach

West Palm Beach, FL, October 17, 2011-- Miller's Fine Decorative Hardware announced the grand opening of their new showroom in West Palm Beach. Located at 501 South Olive Avenue, Miller's is now conveniently located for their clients and colleagues in the Palm Beaches. Once the home of the 1940's Trailways bus station, they completely renovated the historic building, due to careful planning and designing by Tom Kirchhoff, owner of the award-winning Thomas M. Kirchhoff Architects.

Miller's prides itself in offering a wide selection of kitchen, bath, cabinet hardware, tile, and lighting products – and has been doing so for over 20 years. With the opening of their newest showroom, they now offer even more product lines from leading national brands like Waterworks, Jorger, Blu Bathworks, Jesyka, Lacava, and more. Rohl's luxury Jorger line as well as Waterworks carefully selected Miller's Fine Decorative Hardware as the sole retailer of their exclusive product lines offered from the Treasure Coast to the Palm Beaches. Innovation, craftsmanship and quality are at the forefront of these beautiful new collections.

A second location and superior customer service, coupled with a mix of the best kitchen and bath products available on the market today demonstrate why Miller's Fine Decorative Hardware continues to help their customers, interior designers, architects and builders turn their bathrooms and kitchens into affordable, luxurious retreats.
